

3Shape Scanner Instructions (Suggested Workflow)

Pre-Scan Instructions

Scan Instructions

Step

Scan patient's lower and upper arches, and obtain a single occlusion scan as described in the **Proclaim Scanning Guide**. It is recommended to skip the second occlusion. Manual alignment may be performed during occlusion scan, if needed.

Step 02

Post-process case.

Exporting STL files

Step

Select the scan you would like to export, and press the 3 dots as shown to display a dropdown menu.

Step 02

Select "Scans" and "Export".

Step

Select your desired destination folder. Ensure "STL" is selected under "Save as type".

Step 04

Label the files for exporting - this name will prefix each exported file.

Step 05

Files are exported. Note that each file has a suffix identifying the case.
