Primescan Scanner Instructions
(Suggested Workflow)

Pre–Scan Instructions

Step 01	Select "Add New Patient", and enter requested patient information.

| Step 02	Proceed to "Scan".

Scan Instructions

Step 01	Scan patient's lower and upper arches, and obtain a single occlusion scan as described in the **Proclaim Scanning Guide**. It is recommended to skip the second occlusion. Ensure auto–alignment of arches.

Step 01

Note that in order to advance to the "Model" phase, it may be necessary to select a tooth. "Auto-detect" as Restoration Type and "Biogeneric individual" is suggested.

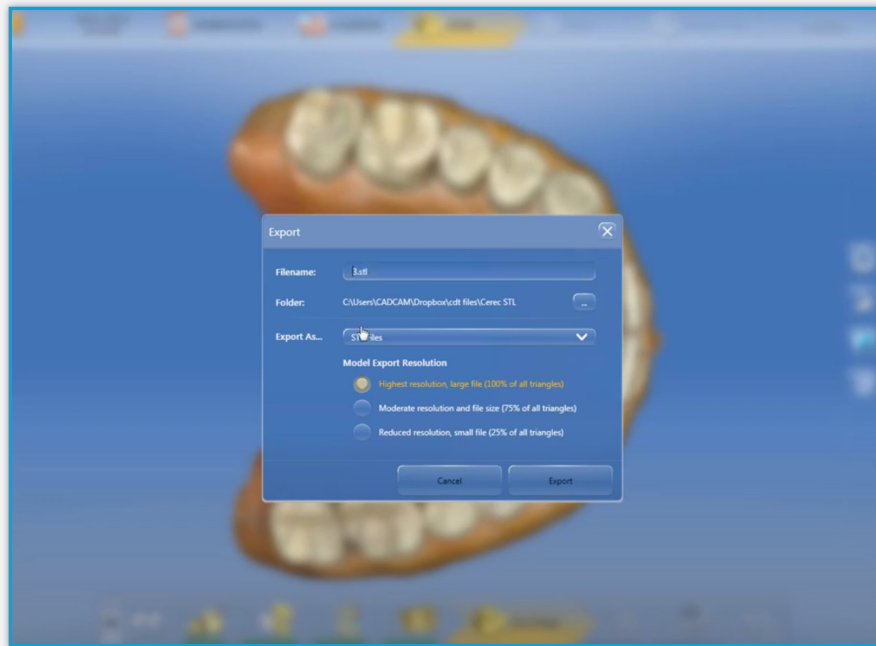

Step 02

Navigate to the "Model" phase. Select the arrow in the top left corner, and select "Export".
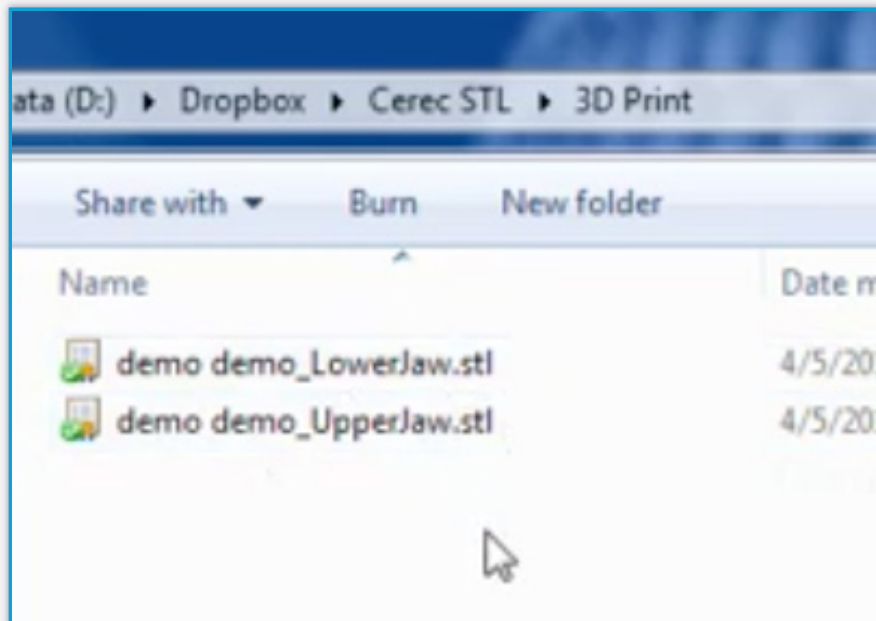

Step 03

A pop-up window will appear. Enter the file name, select your file location, and export as "STL files". Any resolution is acceptable. Select "Export".

Step 04

Your files will be present in the selected folder.

Step 01

Log into **Proclaim Connect** and follow **this link** for instructions on how to upload scans.
